

PROCESS MATERIAL CERTIFICATION INTERNATIONAL

SF-07-131
Rev. F
ENG-00093469
Date: May 11, 2026
Page 1 of 1

Under Federal law, a Safety Data Sheet (SDS) must be provided for any hazardous media. **To ensure the safety of all persons handling returned products, Swagelok Company cannot accept the return of any products that were exposed to any hazardous or unidentified media, unless the product has been properly decontaminated.** In addition, please identify below the media to which the product has been exposed to enable a useful evaluation of the product and the compatibility of the process media with the product's materials of construction.

By signing below, the undersigned verifies that all parts being returned to Swagelok have been fully decontaminated and that all test or process media to which the parts were exposed are accurately identified below.

Please provide an English translation of this document.

Customer Initials _____

To be completed by the Sales and Service Center (SSC):

SSC _____	Part Number(s) _____	Quantity _____
Salesman _____	_____	_____
Customer _____	_____	_____

To be completed by the customer: Check and complete all that apply.

- The product is new and unused (never removed from factory packaging).
- The product has been removed from factory packaging but has never been in contact with any process or test media.
- The product has only been in contact with media that are not hazardous: (list all that apply)

_____ *For example: clean air, water, helium, nitrogen, etc.*

- The product has been in contact with hazardous media, as defined by the SDS: (list all that apply)

_____ **Provide a detailed description of the decontamination procedure below.*

- An English language SDS has been provided for all hazardous process, test, and decontamination media.

***Description of decontamination process:** (Attach an additional page or schematic, if necessary. Please provide a contact name for follow up questions.)

Decontamination media:

Duration and number of purge cycles:

Pressure:

Temperature:

Customer Name _____ Company _____

Customer Signature _____ Department _____

Date _____ Phone or e-mail _____

以下三項為產品異常退檢重要訊息

- a. 請務必以全英文完整填妥附件中的 PMC(Process Material Certification) 表，此為退回美國總部之必要文件。
- b. 請確保退回異常品中的化學物質已清理乾淨，若經美國總部判定有危險因質及污染，美國總部會立即銷毀異常品，，將不會退還異常品亦不會退還貨款及提供新品。 (請見以下原廠英文說明)
- c. 請在異常品退貨外箱寫上**異常品退貨及貴司退檢號#**，以協助我司辨別。

If we find unknown or hazardous contamination inside a returned product, we will stop the evaluation, and the Environmental Health & Safety team will dispose of it. It is illegal for us to ship products that are contaminated with unknown or hazardous substances, so we cannot return them to the customer.

When the customer signs the PMC, they are certifying the product is fully decontaminated internally and externally. If the product is not fully decontaminated, our lab technicians can be seriously injured by residual hazardous media.

Even if the product was only used with non-hazardous media, like clean water, it is a best practice to purge the product to remove any residual materials.
